

COVID19 DASHBOARD

Confirmed Cases
602,796,643

Death Cases
6,487,401

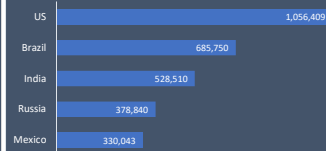

Death Rate
1.08%

Top 5 confirmed cases by Countries

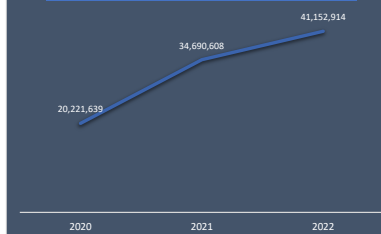

US has the highest number of confirmed cases with over 96M among the TOP 5 countries followed by India and Brazil with over 44.5M and 34.6M respectively

Top 5 Death cases by Countries

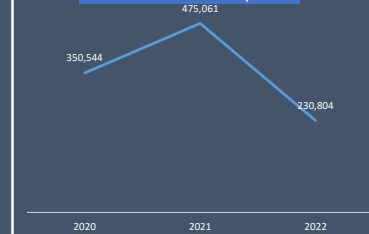

The US also took the lead of the death rate cases with 1M cases. Brazil came second with over 600T followed by India with over 500T cases among the TOP 5 Countries

Number of confirmed cases by Year

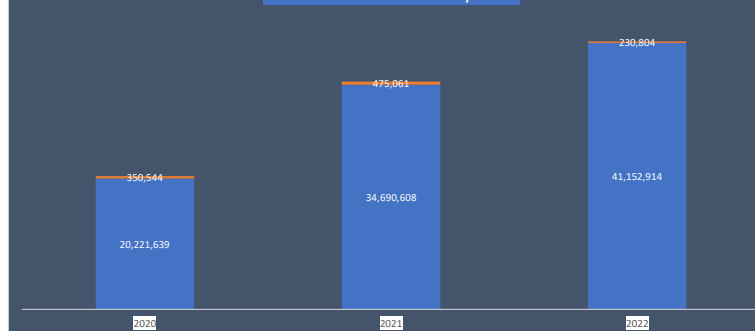

In 2020, the total confirmed cases was 20.2M and over 14.4M increase cases in 2021, however, in 2022, there was great decrease in the recorded cases

Number of deaths by Year

Great decrease in 2021 compared to 2020 where we have over 350 thousand death cases, interestingly, in 2022, a more lesser death cases recorded

US Confirmed & Death by Year

The US in 2020 had more of Confirmed and Death cases compared to the two other years. There were decrease in confirmed and death cases in 2021 but more significant in 2022

RECOMMENDATION: The covid-19 rampage is more visible in North America, Asia, South American respectively compare to other continents, though, as years goes by, the number of confirm cases and death reduces in all the continents, it is however advisable for the World Health Organisation and the heads of each of the countries to continue vaccination with more awareness until we have zero cases as ALL LIVES MATTERS
